DNV ELIGIBILITY ASSESSMENT

Executive Summary

DNV Business Assurance Australia Pty Ltd has been engaged to provide an External Review of the Thaisfoods Group ("TFG" of the "Issuer") Sustainable Finance Framework and proposed Bond issuance against the Social Bond Principles and ASEAN Social Bond Standards.

DNV carried out the External Review through creation of an TFG-specific Assessment Protocol adapted to the purpose of the BOND to confirm alignment of the Sustainable Finance Framework and proposed Bond with the Social Bond Principles 2021 and ASEAN Social Bond Standards 2018.

It is DNV's opinion that the Thaisfoods Group Sustainable Finance Framework and proposed Bond meet the criteria established in the Protocol and are aligned with the stated definition of social bonds within the Social Bond Principles 2021 and are compliant with the requirements of the ASEAN Social Bond Standards 2018.

DNV's External Review conclusion is based on our assessment of the 4 key principles as follows:

- 1. Principle One: Use of Proceeds.** TFG intends to use the proceeds of the BOND to finance and refinance projects and assets associated with Employment Generation and Economic Advancement in local communities. These are described as Social Impacts. DNV undertook an analysis of the associated project types including type and location and scale of the initiatives to determine eligibility of these projects as "Socially Beneficial" in line with the SBP.
- 2. Principle Two: Process for Project Evaluation and Selection.** The BOND's proceeds will be allocated to finance and refinance the assets as defined in Schedule 1. DNV has reviewed evidence that demonstrates that TFG regularly assesses opportunities for improvement and devises action plans and initiatives to mitigate negative environmental and social impacts from its operations.
- 3. Principle Three: Management of Proceeds** DNV has reviewed evidence showing how TFG plans to trace the proceeds from the Bond, from the time of issuance to the time of disbursement. TFG will monitor the allocation of an amount equal to the proceeds via internal information systems. Tracking will be established to facilitate the monitoring and reporting of the issued Bonds and the deployment of an amount equal to the projects and Assets. DNV has confirmed the proposed issuance value is to be less than the TFG exposure to the eligible projects and assets.
- 4. Principle Four: Reporting.** TFG has confirmed that it will include allocation reporting and impact reporting to be made available to stakeholders and be publicly available. Allocations of proceeds will be reported on a portfolio basis with details of selected projects, assets, and expenditures. Impact reporting will be aligned with TFG's existing information flows and will highlight key achievements across the company's sustainability programs.

Introduction, Scope and objectives

Thaifoods Group (“TFG” or “Issuer”), is a complete food manufacture in feed, farm, and food specializing in poultry and pig production. The company operates in both Thailand and Vietnam and has investments and operations in other areas relevant to the food industry such as innovation and the environment. Some of these are discussed below.

TFG has developed a Sustainable Finance Framework and is considering the issuance of bonds as defined within the Social Bond Principles 2021 (“SBP”) and the ASEAN Social Bond Standards, 2018 (ASEAN SBS).

A proposed initial Social Bond is to be issued in THB (henceforth referred to as the “BOND”).

TFG intends to use the proceeds of the BOND to finance and refinance projects within the categories of Employment Generation and Economic Advancement.

DNV Business Assurance Australia Pty Ltd (henceforth referred to as “DNV”) has been commissioned by TFG to provide a Social Bond eligibility assessment of the BOND. Our methodology to achieve this is described under ‘Work Undertaken’ below. We were not commissioned to provide independent assurance or other audit activities.

No assurance is provided regarding the financial performance of the BOND, the value of any investments in the BONDS, or the long-term environmental benefits of the transaction. Our objective has been to provide an assessment that the BOND has met the criteria established on the basis set out below.

The scope of this DNV opinion is limited to the SBP and ASEAN SBS.

Responsibilities of the Management of TFG and DNV

The management of TFG has provided the information and data used by DNV during the delivery of this review. Our statement represents an independent opinion and is intended to inform TFG management and other interested stakeholders in the BOND as to whether the established criteria have been met, based on the information provided to us. In our work we have relied on the information and the facts presented to us by TFG. DNV is not responsible for any aspect of the nominated assets referred to in this opinion and cannot be held liable if estimates, findings, opinions, or conclusions are incorrect. Thus, DNV shall not be held liable if any of the information or data provided by TFG’s management and used as a basis for this assessment were not correct or complete.

Basis of DNV’s opinion

We have adapted our Social Bond Principles and ASEAN Social Bond Standards assessment methodology, to create a TFG-specific Social Bond Eligibility Assessment Protocol (henceforth referred to as “Protocol”). Our Protocol includes a set of suitable criteria that can be used to underpin DNV’s opinion. The overarching principle behind the criteria is that a Social Bond should “enable capital-raising and investment for new and existing projects with social benefits”.

As per our Protocol, the criteria against which the BOND has been reviewed are grouped under the four Principles:

- **Principle One: Use of Proceeds.** The Use of Proceeds criteria are guided by the requirement that an issuer of a Social Bond must use the funds raised to finance eligible activities. The eligible activities should produce clear social benefits.
- **Principle Two: Process for Project Evaluation and Selection.** The Project Evaluation and Selection criteria are guided by the requirements that an issuer of a Social Bond should outline the process it follows when determining eligibility of an investment using bond proceeds, and outline any impact objectives it will consider.
- **Principle Three: Management of Proceeds.** The Management of Proceeds criteria are guided by the requirements that a Social Bond should be tracked within the issuing organization, that separate portfolios should be created when necessary and that a declaration of how unallocated funds will be handled should be made.
- **Principle Four: Reporting.** The Reporting criteria are guided by the recommendation that at least annual reporting to the bond investors should be made of the use of bond proceeds and that quantitative and/or qualitative performance indicators should be used, where feasible.

Work undertaken

Our work constituted a high-level review of the available information, based on the understanding that this information was provided to us by TFG in good faith. We have not performed an audit or other tests to check the veracity of the information provided to us. The work undertaken to form our opinion included:

- Creation of an TFG-specific Protocol, adapted to the purpose of the BOND, as described above and in Schedule 2 and 3 to this Assessment;
 - Assessment of documentary evidence provided by TFG on the BOND and supplemented by a high-level desktop research. These checks refer to current assessment best practices and standards methodology;
 - Assessment of alignment with the Social Bond Principles 2021;
 - Assessment of compliance with the ASEAN Social Bond Standards;
 - Discussions with TFG management, and review of relevant documentation;
 - Documentation of findings against each element of the criteria. Our opinion as detailed below is a summary of these findings.
-

Findings and DNV's opinion

DNV's findings are listed below:

- 1. Principle One: Use of Proceeds.** TFG intends to use the proceeds of the BOND to finance and refinance projects and assets associated with Employment Generation and Economic Advancement in local communities. These are described as Social impacts. DNV undertook an analysis of the associated project types including type and location and scale of the initiatives to determine eligibility of these projects as "Socially Beneficial" in line with the SBP.
- 2. Principle Two: Process for Project Evaluation and Selection.** The BOND's proceeds will be allocated to finance and refinance the assets as defined in Schedule 1. DNV has reviewed evidence that demonstrates that TFG regularly assesses opportunities for improvement and devises action plans and initiatives to mitigate negative environmental and social impacts from its operations.
- 3. Principle Three: Management of Proceeds** DNV has reviewed evidence showing how TFG plans to trace the proceeds from the Bond, from the time of issuance to the time of disbursement. TFG will monitor the allocation of an amount equal to the proceeds via internal information systems. Tracking will be established to facilitate the monitoring and reporting of the issued Bonds and the deployment of an amount equal to the projects and Assets. DNV has confirmed the proposed issuance value is to be less than the TFG exposure to the eligible projects and assets.
- 4. Principle Four: Reporting.** TFG has confirmed that it will include allocation reporting and impact reporting to be made available to stakeholders and be publicly available. Allocations of proceeds will be reported on a portfolio basis with details of selected projects, assets, and expenditures. Impact reporting will be aligned with TFG's existing information flows and will highlight key achievements across the company's sustainability programs.

On the basis of the information provided by TFG and the work undertaken, it is DNV's opinion that the TFG Sustainable Finance Framework and proposed BOND meet the criteria established in the Protocol and are aligned with the stated definition of social bonds within the Social Bond Principles 2021. Based on the External Review procedures conducted, nothing has come to our attention that causes us to believe that the TFG Sustainable Finance Framework and BOND are not, in all material respects, in accordance with the ASEAN Social Bond Standards 2018.
